EMILIO ROMERO GUTIÉRREZ

UX Designer · Research, experience strategy and consulting

Bogotá, Colombia (remote) | emilio.romerog@outlook.com | +57 314 254 3651 | LinkedIn | Portfolio

PROFESSIONAL EXPERIENCE

QStrauss Consulting — Enterprise Adobe Workfront implementations — Apr 2026 – Nov 2026

Technical Architect

- Gathered business and functional requirements with enterprise clients in retail, banking and consumer goods, and translated them into Adobe Workfront workflows, configuration and interfaces.
- Diagnosed implementations that weren't working: mapped the real process against the configured one, interviewed teams and stakeholders, and prioritized process decisions.
- Designed a role-based adoption strategy, with documentation and training, adopted by one client in an end-to-end implementation of about 6 months.
- Tested implementations end to end with development, including Workfront Fusion automations, reviewing bugs before they reached the client.

Ropofy — B2B SaaS, CRM and automation — Jun 2025 – Apr 2026

Jr UX Consultant / UX Designer

- Researched why sales were being lost (6 interviews with recent buyers and 3 months of conversations reviewed by channel) and reframed the brief: the drop-off was in response time, not at checkout.
- Redesigned the site around contact and designed a single inbox for WhatsApp, web and Instagram; discarded a chatbot because the problem was organizational, not volume.
- Led platform adoption across the client portfolio, with strategies for using the tool and for the end-to-end sales funnel, plus training on automation and AI bots.
- Ran user tests and A/B tests on the AI automation flows with development, reviewing bugs in the flows.

genia — Digital agency (freelance) — Oct 2024 – Apr 2025

UX/UI Designer

- Designed and built accessible websites in Webflow, plus interactive experiences and games using gamification and digital storytelling.

ETB — Telecommunications — Feb 2024 – Aug 2024

UX/UI Intern

- Redesigned internal digital platforms used by 500+ monthly users, improving navigation efficiency by 30%.
- Ran usability tests and prioritized findings into design iterations, ensuring cross-device compatibility.

AWARDS AND PROJECTS

- IDB and Alliance for Innovative Regulation TechSprint (2024): category winner, Data Democratization Distinction, and 2nd place overall. Defined the user and the problem; the tool flagged inconsistencies in 311 of 622 public contracts.
- L'Oréal Brandstorm 2025: Regional Top 20 (Colombia, Panama, Peru and Ecuador) with team Apolo.
- Custom Canvas (self-initiated): MVP for documentation and training at scale; usage research, requirements, UX/UI audit and phased plan.

EDUCATION

Universidad Jorge Tadeo Lozano — BA Interactive Design, UX/UI and Game Design — 2020 – 2024

Cymetria — UX Front-End Bootcamp — 2024

McKinsey.org Forward — In progress — 2026

Gimnasio Moderno — High School Diploma — Bogotá
