

Emilio Romero

UX Consultant · Research and experience design for platforms and internal operations

emilio.romerog@outlook.com · +57 314 254 3651 · [LinkedIn](#) · [Portfolio](#)

PROFILE

UX consultant with a background in Interactive Design and experience across internal platforms, B2B SaaS and enterprise tools. I research before I design: I interview users, look at how they actually work and find where the experience breaks; then I design the workflows, interfaces and documentation that fix it. To me an emotion is a business signal: when someone gets tired, doesn't understand, or would rather call, that's usually where the problem is, and the opportunity too.

EXPERIENCE

Technical Architect

April 2026 – Present

QStrauss Consulting · Adobe implementation consultancy

- Diagnose Adobe Workfront implementations that aren't working for enterprise clients in retail, banking and consumer goods: interview the teams using them, compare the real process against the configured one, and turn findings into workflow design decisions.
- Redesign workflows with a user-experience lens to reduce friction and shorten delivery cycles.
- Design role-based adoption strategies (what each person needs to know, when, and with what question in mind) and build the documentation and training behind them; these deliverables have cut training and follow-up meeting time.

UX Consultant / UX Designer

June 2025 – April 2026

Ropofy · B2B SaaS (CRM and automation)

- Researched why sales were being lost by interviewing recent buyers and reviewing three months of inbound conversations; the finding (the drop-off wasn't at checkout but in response time) redefined the entire project.
- Redesigned the product site around contact rather than the catalogue, and discarded the solution everyone expected (a chatbot) because the problem was organizational, not technological.
- Unified three inbound query channels (WhatsApp, web and Instagram), which ran with no owner or traceability, into a single inbox.
- Led platform adoption across the client portfolio, designed training on automation and AI bots, and contributed to growth in visitors and leads alongside the commercial team.

UX/UI Designer (freelance)

October 2024 – April 2025

genia

- Designed and built websites in Webflow, adding gamification mechanics to the experience.

UX/UI Design Intern

February 2024 – August 2024

ETB · Telecommunications

- Redesigned internal digital platforms used by 500+ monthly users; the new interfaces improved navigation efficiency by 30% and reduced interaction time.
- Ran usability tests and fed findings into design iterations, focusing on accessibility and cross-device compatibility.

FEATURED PROJECT

- **Custom Canvas / WF Documentation App** — Self-initiated, outside my formal responsibilities. Internal product for documenting and generating training material at scale. I ran the usage research and the full UX/UI audit (navigation architecture, action hierarchy, unified component system, colour discipline) and defined a phased refactoring plan: fix the system before the components.

RECOGNITION

- **IDB & Alliance for Innovative Regulation TechSprint (2024)** — Data Democratization Distinction and second place overall. We defined the user and the problem, and built a Power BI public-procurement transparency solution that flagged inconsistencies in 311 of 622 contracts.
- **L'Oréal Brandstorm 2025** — Regional Top 20 (Colombia, Panama, Peru and Ecuador) with team Apolo, with a project to bring male consumers closer to personal care through technology.

EDUCATION

Interactive Designer, UX/UI and Game Design emphasis	— Universidad Jorge Tadeo Lozano	2020 – 2024
Concept artist and copywriter	— NTS research group, UJTL	2020 – 2023
Front End UX Bootcamp	— Cymetria	2024
High School Diploma	— Gimnasio Moderno, Bogotá	

SKILLS

Research: UX research · Interviews and synthesis · Usability testing · Journey maps · Service blueprints · Information architecture

Design: UX/UI design · Wireframing and prototyping · Design systems · Accessibility (WCAG) · Gamification · Storytelling

Consulting: Process mapping · Requirements gathering · Stakeholder management · Adoption and training strategy

Tools: Figma · Webflow · Adobe Workfront · Power BI · HubSpot · HTML / CSS / JS · Adobe Creative Suite · Google Workspace · Microsoft 365

LANGUAGES

Spanish (native) · English C1 · Basic sign language
