PROFILE

I turn research into business decisions. I work between experience strategy and business analysis: I interview users and stakeholders, map processes, gather requirements, and find where the experience breaks — and where that costs the business money. My deliverable isn't a screen: it's a well-framed problem, a decision someone can defend on Monday, and a metric agreed on up front. Users rarely say the flow has a problem; they say they got tired or preferred to call, and my job is to turn that into a product or process decision.

PROFESSIONAL EXPERIENCE

Technical Architect / Business Analyst

QStrauss Consulting | April 2026 – Present

- Gather business and functional requirements with enterprise clients across retail, banking and consumer goods, and translate them into Adobe Workfront configuration and workflows.
- Diagnose implementations that aren't working: map the real process against the configured one, interview teams and stakeholders, and turn those findings into prioritized process decisions.
- Redesign and restructure client workflows to reduce friction and shorten delivery cycles, aligning the business need with the end user's experience.
- Define the adoption strategy: identify what each role needs and when, and build the documentation and training that supports it.

Client names are covered by non-disclosure agreements.

UX Consultant / Business Analyst

Ropofy — B2B SaaS (CRM and automation) | June 2025 – April 2026

- Researched why sales were being lost — 6 interviews with recent buyers and three months of conversations reviewed channel by channel — and reframed the brief: the drop-off wasn't at checkout but in response time. A research finding that changed the business decision.
- Prioritised redesigning the site around contact rather than catalogue, and discarded the solution everyone expected (a chatbot) because the problem was organizational — a scope decision defended with data.
- Led platform adoption across the client portfolio and designed the training on process automation and AI bots.
- Contributed to client reactivation and lead generation strategy alongside the commercial team.

UX/UI Designer (freelance)

genia | October 2024 – April 2025

- Designed and built accessible websites in Webflow, and developed interactive experiences and games applying gamification and digital storytelling.

UX / Experience Analysis Intern

ETB — Telecommunications | February 2024 – August 2024

- Redesigned internal digital platforms used by 500+ monthly users, improving navigation efficiency by 30% and reducing interaction time.
- Ran usability testing, analysed the findings and prioritized them into design iterations, ensuring cross-device compatibility.

PROJECTS

- Custom Canvas / WF Documentation App — Self-initiated project, outside my formal responsibilities. Internal product for documenting and generating training material at scale. I ran the usage research, defined the requirements and the full UX/UI audit (navigation architecture, action hierarchy, component system) and a phased implementation plan.

AWARDS

- Category winner, Data Democratization Distinction — and second place overall — TechSprint by the IDB and the Alliance for Innovative Regulation (2024). Defined the target user and the problem, and automated public-tender verification with Power BI and AI: inconsistencies flagged in 311 of 622 contracts.
- Regional Top 20 — L'Oréal Brandstorm 2025. Semifinals for Colombia, Panama, Peru and Ecuador with team Apolo: an innovation project connecting male consumers to personal care through technology.

SKILLS

Business analysis: Requirements gathering · Process mapping and redesign · Use cases · Stakeholder management · KPI and metric definition · Prioritisation (impact vs effort) · Operating model design

Experience strategy: UX research · Interviews and synthesis · Journey maps and service blueprints · Usability testing · Information architecture · UX/UI design · Prototyping

Delivery: Functional documentation · Risk analysis · Training and enablement · Agile methodologies

Tools: Figma · Webflow · Adobe Workfront · Adobe Creative Suite · Power BI · HubSpot · HTML / CSS / JS · Confluence / Jira · Google Workspace · Microsoft 365

EDUCATION

- BA Interactive Design, focus on UX/UI and Game Design — Universidad Jorge Tadeo Lozano (2020 – 2024)
- UX Front-End Bootcamp — Cymetria (2024)
- Gimnasio Moderno — High School Diploma, Bogotá
