PROFILE

Interactive designer and UX consultant. What drives me is building new experiences: genuinely understanding what the person on the other side needs, and turning that into tools that work, that can be replicated, that can be automated, and that leave measurable impact. I apply user-centred design to both digital products and internal company operations: I research, prototype, validate, and stay until people actually adopt it. My background is UX/UI and game design, and I moved into consulting because I wanted to understand how transformation happens inside an organization, not just how the interface looks at the end.

PROFESSIONAL EXPERIENCE

Technical Architect

QStrauss Consulting — Code and Theory Network (Stagwell) | April 2026 – Present

- Lead technical consulting on Adobe Workfront implementations for enterprise clients across retail, banking and consumer goods, diagnosing configuration and adoption issues and designing the solutions that resolve them.
- Redesign and restructure client workflows to reduce friction and shorten delivery cycles.
- Build the technical documentation that lets client teams understand how their instance is configured and how work flows through it, reducing their dependency on the consulting team.
- Develop an internal documentation tool (Custom Canvas) for producing Workfront training material at scale; led its full UX/UI audit and phased refactoring plan.
- Integrate AI tools (Claude, Gemini, NotebookLM) into documentation and analysis workflows, accelerating the production of technical deliverables.
- My documentation deliverables have reduced the time spent on training, meetings and clarification cycles within implementations that typically run from 3 to 6+ months, shortening the path to delivery.
- Deliver interfaces, training decks, commercial proposals and risk analyses.

Client names are covered by non-disclosure agreements.

Jr UX Consultant / UX Designer

Ropofy — B2B SaaS (CRM and automation) | June 2025 – April 2026

- Led platform adoption across the client portfolio: implementation support, issue resolution, and acting as the bridge between clients and the development team.
- Redesigned the product website based on end-user needs; the redesign accompanied growth in traffic and lead generation during the company's stabilization stage.
- Designed and delivered ongoing training on process automation and AI bots.
- Contributed to client reactivation and lead generation strategy alongside the commercial team.

UX/UI Designer (freelance)

genia | October 2024 – April 2025

- Designed and built accessible websites in Webflow, and developed interactive experiences and games applying gamification and digital storytelling.

UX/UI Design Intern

ETB — Telecommunications | February 2024 – August 2024

- Designed and implemented interfaces that improved navigation efficiency by 30% and reduced interaction time.
- Contributed to the redesign of internal digital platforms used by 500+ monthly users, improving accessibility and responsiveness.
- Ran usability testing and fed findings back into design iterations, ensuring cross-device compatibility.

PROJECTS

- Custom Canvas / WF Documentation App — Documentation and training-material tool for Adobe Workfront implementations. Full UX/UI audit (navigation architecture, action hierarchy, component system, colour discipline) and phased implementation plan.

AWARDS

- Second place — TechSprint by the IDB and the Alliance for Innovative Regulation (2024). Power BI solution for transparency in government processes.
- Regional Top 20 — L'Oréal Brandstorm 2025. Semifinals for Colombia, Panama, Peru and Ecuador with team Apolo: an innovation project connecting male consumers to personal care through technology.

SKILLS

Platform & process: Adobe Workfront · Implementation consulting · Service design · Process redesign and optimization · Technical documentation and enablement · Risk analysis · Stakeholder management

Design & product: UX research · UX/UI design · Prototyping · Design systems · Information architecture · Usability testing · Accessibility (WCAG) · Storytelling and gamification

Tools: Figma · Webflow · Adobe Creative Suite · Power BI · HubSpot · HTML / CSS / JS · Confluence / Jira · Google Workspace · Microsoft 365 · Claude, Gemini and NotebookLM in documentation and analysis workflows

EDUCATION

- BA Interactive Design, focus on UX/UI and Game Design — Universidad Jorge Tadeo Lozano (2020 – 2024)
- UX Front-End Bootcamp — Cymetria (2024)
- Adobe Workfront Certification — in progress
