PROFILE

I research to understand a business and the people inside it, then design the system that resolves what I find. I don't think either one works well without the other. I work at the intersection of user research, service design and business analysis: I interview, map processes, find where the experience breaks, and design the workflows, interfaces and documentation that fix it. My territory is internal operations and the platforms that support them — where one design decision changes how hundreds of people work.

PROFESSIONAL EXPERIENCE

Technical Architect

QStrauss Consulting | April 2026 – Present

- Lead Adobe Workfront implementations for enterprise clients across retail, banking and consumer goods: requirements gathering, instance configuration, and design of the workflows that support it.
- Diagnose implementations that aren't working: map the real process against the configured one, interview the teams using it, and translate those findings into design and process decisions.
- Redesign and restructure client workflows to reduce friction and shorten delivery cycles, applying user-experience judgement to internal processes.
- Design the adoption strategy: identify what each role needs to know, when, and with what question in mind, then build the documentation and training that resolves it.

Client names are covered by non-disclosure agreements.

UX Consultant / UX Designer

Ropofy — B2B SaaS (CRM and automation) | June 2025 – April 2026

- Researched why sales were being lost by interviewing recent buyers and reviewing three months of inbound conversations; the finding — the drop-off wasn't at checkout but in response time — redefined the entire project.
- Redesigned the product site around that finding, and discarded the solution everyone expected (a chatbot) because the problem was organizational, not technological.
- Led platform adoption across the client portfolio and designed the training on process automation and AI bots.
- Contributed to client reactivation and lead generation strategy alongside the commercial team.

UX/UI Designer (freelance)

genia | October 2024 – April 2025

- Designed and built accessible websites in Webflow, and developed interactive experiences and games applying gamification and digital storytelling.

UX/UI Design Intern

ETB — Telecommunications | February 2024 – August 2024

- Designed and implemented interfaces that improved navigation efficiency by 30% and reduced interaction time.
- Contributed to the redesign of internal digital platforms used by 500+ monthly users, improving accessibility and responsiveness.
- Ran usability testing and fed findings back into design iterations, ensuring cross-device compatibility.

PROJECTS

- Custom Canvas / WF Documentation App — Self-initiated project, outside my formal responsibilities. Internal product for documenting and generating training material at scale. I ran the usage research and the full UX/UI audit (navigation architecture, action hierarchy, unified component system, colour discipline) and defined the phased refactoring plan: resolve the system before the components.

AWARDS

- Category winner, Data Democratization Distinction — and second place overall — TechSprint by the IDB and the Alliance for Innovative Regulation (2024). Power BI solution for transparency in government processes.
- Regional Top 20 — L'Oréal Brandstorm 2025. Semifinals for Colombia, Panama, Peru and Ecuador with team Apolo: an innovation project connecting male consumers to personal care through technology.

SKILLS

Research & service design: UX research · Interviews and synthesis · Usability testing · Journey maps and service blueprints · Process mapping and redesign · Information architecture · Operating model design

Design & product: UX/UI design · Design systems and component libraries · Wireframing and interactive prototyping · Accessibility (WCAG) · Documentation as a product

Business & delivery: Business analysis · Requirements gathering · Stakeholder management · Commercial proposals · Risk analysis · Training and enablement

Tools: Figma · Webflow · Adobe Workfront · Adobe Creative Suite · Power BI · HubSpot · HTML / CSS / JS · Confluence / Jira · Google Workspace · Microsoft 365

EDUCATION

- BA Interactive Design, focus on UX/UI and Game Design — Universidad Jorge Tadeo Lozano (2020 – 2024)
- UX Front-End Bootcamp — Cymetria (2024)
- Adobe Workfront Certification — in progress
